

Should number of packed items match the Packing List inventory total number of items ?

Yes, Packing list total, and actual number of packed items **must match**. If they are different it is impossible to receive customs approval and additional remedial work to correct the problem will be required.

Work inside bonded warehouses is prohibited which means getting access to cargo may involve:

- a) Removing cargo from the warehouse (Paying a removal charge)
- b) Trucking (Truck charge)
- c) Sorting (Paying a labor charge)
- d) Unpacking/repacking/ verifying & marking as appropriate. (Paying a labor charge)

For self packed moves please save considerable stress, (and additional expense) by making sure number of items and packing list totals match.

Should number of packed items match the Packing List inventory total number of items ?

(For a tally sheet to recheck numbers when loading/unloading please request from customer support).
