

Through our network of agents and brokers, MovingJapan.com coordinates boat and yacht transportation to and from any port on a worldwide basis. We provide solutions using specialist yacht carriers, heavy lift carriers, semi-submersible carriers, container carriers, RoRo carriers and gearless vessels using shore/ floating cranes.

We offer:

- Arrange freight with specialist yacht carrier, heavy lift vessel or gearless vessel with shore/floating cranes at both ends.
- Provision of lifting plan by either hook or sling (kevlar)
- Provision of stowage plan showing bedding, lashing/securing and calculations based on IMO requirements.
- Arrange craddles (steel, wood, etc)
- Arrange under water divers, in case of slinging and dependant upon size of vessel
